

Rapid Contextual Design Steps

Rapid CD means planning and trade-offs

Rapid CD variants for 2 person teams

Rapid CD Process	Contextual Interviews & Interpretation	Sequence Models	Affinity Diagrams	Wall Walk & Visions	Storyboards	Paper mock-ups
Lightning Fast 1-4 weeks	✓		✓	✓	Use your existing process	
Lightning Fast + 4-8 weeks	✓		✓	✓		✓
Focused Rapid CD 6-10 weeks	✓	✓	✓	✓	✓	✓

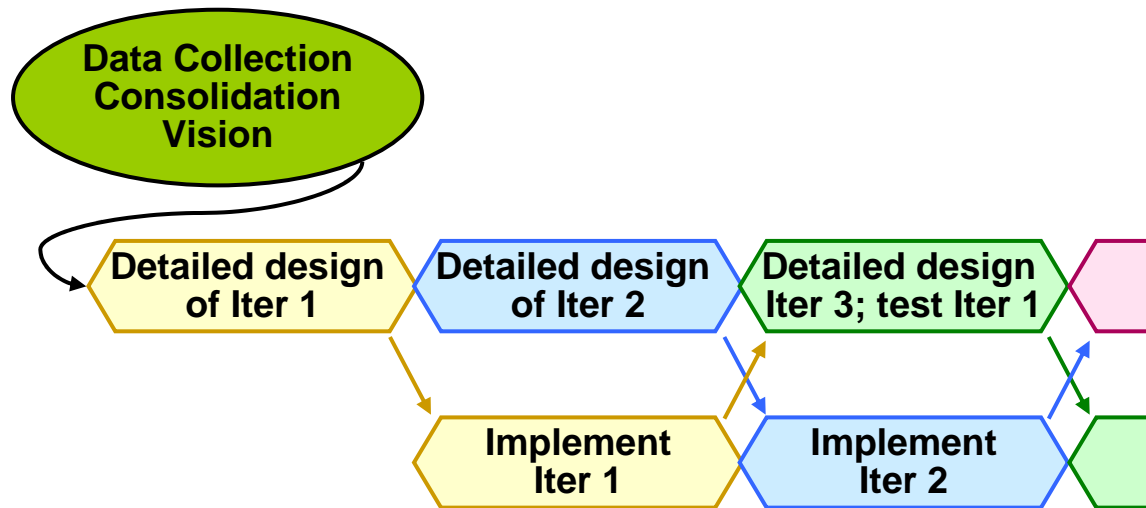

Phone based interviews and interpretations can work for...

- ◆ Overseas validation of work practice after a number of field interviews – if the work is system or web based
- ◆ Testing interaction and visual design late in the cycle
- ◆ Interpretation sessions supported by live meeting for 2 person distributed teams

CD and XP

CD can fit with an Agile development process

- ◆ Customer team does CD to determine needs
- ◆ Collect data, consolidate and vision to determine project scope
- ◆ Develop vision in parts to drive implementation iteratively
- ◆ Test implementation base levels iteratively

Issues in Rapid User Centered Design

- ◆ Do I have to do all the steps – what is essential?
- ◆ I only have two people on my team, can I still do it?
- ◆ What can I do in a few weeks?
- ◆ How can you simplify the data capture and analysis?
- ◆ When can remote user interviews appropriately be used?
- ◆ How does UCD fit in with my existing design process?
- ◆ How fast is fast? Is fast just a perception? Is it really organization change push-back?
- ◆ Can a small UCD team still get buy-in from development?
- ◆ ???
